

Week 1 – Task 1: AI Tool Exploration & Report

Objective:

Understand how AI tools assist in automation and productivity.

Instructions:

- Use ChatGPT to explain AI in simple words.
- Generate Python code using ChatGPT.
- Create a small Python error and ask ChatGPT to debug it.
- Take screenshots of prompts and responses.

Submission Requirements:

- Submit a 2-page PDF report.
- Include screenshots of prompts and outputs.
- Write what you learned from this activity.
- Mention one limitation of AI tools.

Learning Outcome:

Students will understand how AI tools can automate coding and explanation tasks.
