

Week 1 – Task 4: Real-World AI Automation Analysis

Objective:

Analyze how AI is used in real-world industries.

Instructions:

- Choose one industry (Healthcare, Banking, Security, Education, E-commerce).
- Explain how AI is used in that industry.
- Identify whether it is AI or ML.
- Explain what type of data is used.
- Discuss whether AI can replace humans fully.
- Mention one risk of AI in that industry.

Submission Requirements:

- Submit a 1-page PDF or Word document.
- Use clear structure and headings.

Learning Outcome:

Students will develop analytical thinking and real-world AI understanding.
